

# Care for Older Adults Program

Take advantage of the Care for Older Adults Program that **helps health plans reach the Medicare Part C population and improve their ratings**. The Care for Older Adults Program opens a dialogue between members and prescribers to provide continuity of care as it relates to pain assessment and medication safety.

## Program features

- Delivers **live member communication** AND follow-up with a personal medication list and medication action plan, **helping them to understand and maintain their medications**
- Provides **opportunities for comprehensive and continuity of care**
- **Encourages providers to update EHR systems** with the documentation provided
- Sends **automated fax delivery to the prescriber** with the member's full medication list and pain assessment scores
